Market Growth

The printing industry in India is the biggest and fastest-growing sector along with its allied industries such as Printing Machinery Manufacturer, Packaging, Paper, Ink and manufacturers of raw material and consumables. According to the market research report, “The value of the print industry is projected to exceed 250 billion rupees by 2024, indicating a growth driven by growing Indian economy, increasing consumerism, entry of global brands in the country along with rising foreign investments.”

With advancements across the industry, Indian printers of today are now equipped with revolutionary technologies such as computer-controlled printing machines and flow lines for binding along with UV digital printing and inkjet technology which are also on the rise.

Moreover, “The global Digital Printing market size is projected to reach USD 27.2 Billion by 2026, growing at a CAGR of 3.8% during the forecast period of 2021-2026.” The industry is witnessing an increasing demand for premium packaging materials from various end-user industries that manufacture cosmetics, alcoholic drinks, and household products. This, in turn, will propel growth for the global digital printing market size.

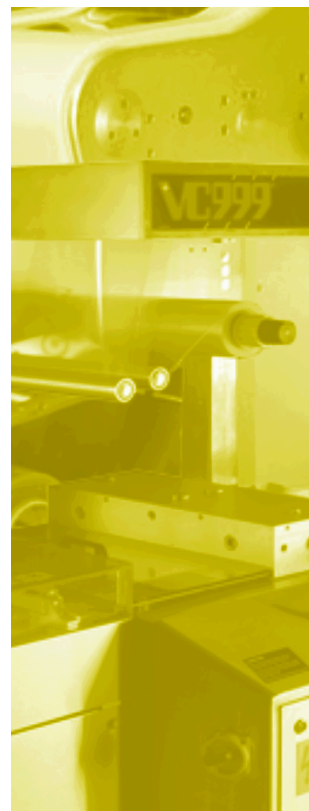

Digital Printing results in quicker turnaround time and reduced cost. The use of digital printing helps produce images of higher quality at cheaper costs. Therefore, the need to reduce the cost of printing without compromising the quality of the image is further propelling demand for digital printing technology.

Who Will Exhibit?

- Automation and 3d design
- Book binding machine
- Cold foil and hot foil stamping machines
- Corrugated machinery
- Design corrugation for furniture and structures
- Die punching machines
- Digital embellishments
- Digital presses
- Duplicating / imaging systems
- Finance services
- Flexo printing machine (combi offset + flexo + screen printing)
- Foils, films and plastics
- Gluing systems
- Inks and consumables
- Laminating machine
- Laser printing machine (laser engraving and laser die cutting)
- Material handling supplier
- Non-woven bag machines
- Paper converting machine
- Paper cup machines
- Paper cutting machine
- Post press solutions
- Prepress solutions
- Print finishing equipment
- Rigid box making machine
- Roller & cylinder
- Routers and sample maker
- Rubber rollers
- Screen printing machines
- Sheet fed offset printing machines
- Software solutions
- Speciality papers and boards
- Testing equipment
- Uv curing systems
- Web offset printing machine

Who will Visit?

A large number of B2B visitors are expected to attend covering:

- Printers & Print Buyers
- Publishers including owners of Commercial Newspapers
- Converters, Corrugated Box Manufacturers
- Production / Quality Control Managers from FMCG and Retail sectors
- Government Agencies and Associations
- End users influencing audience segments like design houses and art directors & production managers of corporate companies, the pay-per-print business and media production
